

PROFILE

Senior Project Manager

The Senior Consultant shall, in accordance with the business direction of Resolute Technology Solutions Inc. ("RTS"), play a role (i.e. Project Manager) and is responsible for working with RTS staff and/or its Clients, as assigned by RTS. The Senior Consultant is also required to manage projects and lead teams to deliver business value. You must be fluent in the disciplines of project management, analysis, modeling and software design.

RESPONSIBILITIES

- Performs necessary investigation, analysis and evaluation to determine project feasibility
- Develop project cost and benefit estimates to establish project worth including the development of alternative considerations leading to recommendations for new applications, infrastructure, technology installations, or changes to existing ones
- Able to work on business, application and/or infrastructure projects
- Develops time schedules, conversion and test procedures for all aspects of the system (from manual through to automated processes)
- Plans the full range of development activities (design, build, unit testing, integration testing, end user testing, training, implementation, warranty support)
- Monitors, instructs and/or assigns work components to other staff where instructed/required
- Participates in business process transformation (innovation or improvement) as required/requested to meet defined business objectives (increased quality, reduced cycle times, reduced cost)
- Provides leadership within the group to advance delivery services capabilities by contributing to the continual improvement of methods, tools and techniques that are related to the project management function
- Follows change management, issue management and quality management (defect tracking) process as well as release management processes
- Tracks progress against plans and reports both routinely and by exception to Client and to RTS Management
- Anticipates, identifies and resolves issues and problems by mobilizing the necessary resources and using appropriate escalation procedures
- Ensures appropriate consideration is given to accepted industry guidelines and practices, including project management methodologies
- Ensures quality of product and process by overseeing the preparation, submission and acceptance of deliverables and by conducting a post project review to capture lessons learned

- Perform other special projects/services as assigned for RTS and/or its Clients

QUALIFICATION REQUIREMENTS

Experience/Education/Training

- Must have a credential from the Project Management Institute (PMI) as well as a Prince2 certification or be prepared to enroll into the course/write the exam within the first year of employment
