

---

### **Project Case Overview**

*A financial management company needed help relocating its technology to an office space that was yet to be built.*

*Resolute designed the infrastructure-related components of the new space, such as voice and data cabling. A computer room including raised floor, dedicated air conditioning, UPS power, and specialized fire suppression was also custom designed.*

*Resolute also coordinated the critical move of telecommunications from one location to another, ensuring no impact to business.*

*Transition from the current space to the new space was completed off-hours within an approximate four-hour outage.*

---

### **Scope & Objectives of Project**

- Design robust office space for workstations
- Design computer room for current and future needs
- Minimal downtime from current space to new space
- Enough battery run-time for key system components to complete critical business functions in the event of a power outage

### **Key Client Benefits**

- Robust computer room with power, cooling and monitoring
- Workspace designed for quick growth
- Uninterruptable power supply (UPS) for the key business systems to stay operational in the event of an outage

### **Key Activities**

- Workspace technology design
- Computer room design
- Migration of all infrastructure to new space (servers, workstations, printers, telephones, Internet)
- Management and oversight of all technology planning and installation during office construction process

### **Major Deliverables**

- Voice and data lines moved to new space with minimal after hours outage
- All infrastructure moved to new space with minimal after hours outage

### **Length of Project**

- This complete office build project was completed in 10 months
- Actual technology was relocated over a weekend

### **RTS Resources**

- Project Manager
- Architect
- Server Specialist
- Desktop Specialist
